How We Protect the Ecosystem

Proactive, automated, and community-driven threat hunting

Automated Discovery

Our open-source scanners monitor multiple threat vectors 24/7:

- **Paid Ads:** Google, Meta, X networks
- **Social Media:** Telegram, Discord, Twitter
- **Email Campaigns:** Phishing newsletters
- **DNS Records:** Newly registered domains
- **Certificate Transparency:** SSL monitoring

Partner Network

Direct relationships enable rapid response:

- **Domain Registrars:** Immediate suspension
- **Hosting Providers:** Content removal
- **CDN Services:** Traffic blocking
- **Security Vendors:** Blocklist updates
- **Wallet Providers:** User warnings

Public Database

Complete transparency with open access:

- **Live Feed:** Real-time threat updates
- **Historical Data:** Complete archive since 2021
- **Export Formats:** JSON, CSV, TXT, hosts
- **GitHub Repository:** All data publicly available
- **Community Reports:** Crowdsourced intelligence

Impact Simulator
