What this means — the Community Market listing ceiling
Steam’s own market refuses a listing above roughly $1,800. A seller may ask less, never more. Items whose market price sits above that line therefore cannot be sold at that price on Steam at all — which is the mechanism that moves those sales to third-party venues while the item itself never leaves Valve’s inventory system.

What this means — OpenID and openid.realm
OpenID is the sign-in standard behind the “Sign in with Steam” button: the site does not receive the password, Steam confirms the identity to it. **openid.realm** is the field carrying the address of the site asking for the sign-in, and **openid.return_to** the address Steam is to send the user back to. Steam receives both on every request and prints the realm on its own login page — which is why this dossier can name the host each platform authenticates through.
